PROJECT

Handwritten Digit Recognition using CNN

May 2025 - Jun 2025

- Developed a digit classification model using CNN to recognize handwritten digits from the MNIST dataset.
 - Achieved 98% accuracy using TensorFlow and Keras with multiple convolution and pooling layers.
 - Preprocessed image data and applied normalization for faster convergence.
 - Visualized training results with Matplotlib and evaluated model performance with confusion matrix.
 - Deployed model on a simple Flask web interface for real-time predictions.
-

EDUCATION

Sri Krishna Arts and Science College

Jun 2023 - Apr 2026

Bachelor of Science in Data Science (B.Sc. DS) — Pursuing
Current CGPA - 8.5/10

INTERNSHIP

Machine Learning Intern

May 2025

Appin Technology, Coimbatore

- Completed a hands-on internship program focused on core machine learning concepts and real-time applications.
 - Gained practical experience with supervised and unsupervised learning algorithms such as Linear Regression, Decision Trees, K-Means Clustering, and Naive Bayes.
 - Worked on mini-projects involving data preprocessing, model training, and performance evaluation using Python (scikit-learn, Pandas, Matplotlib).
 - Collaborated with a team of interns to solve real-world data problems and present findings.
 - Learned the end-to-end machine learning pipeline from data collection to model deployment basics.
-

SKILLS

- **Technical Skills:** JAVA programming, Python programming, Power BI google, excel worksheet, Machine learning.
- **Soft Skills:** Communication, Teamwork & Collaboration, Problem Solving, Time Management
- **Languages:** English, Tamil, Kannada
